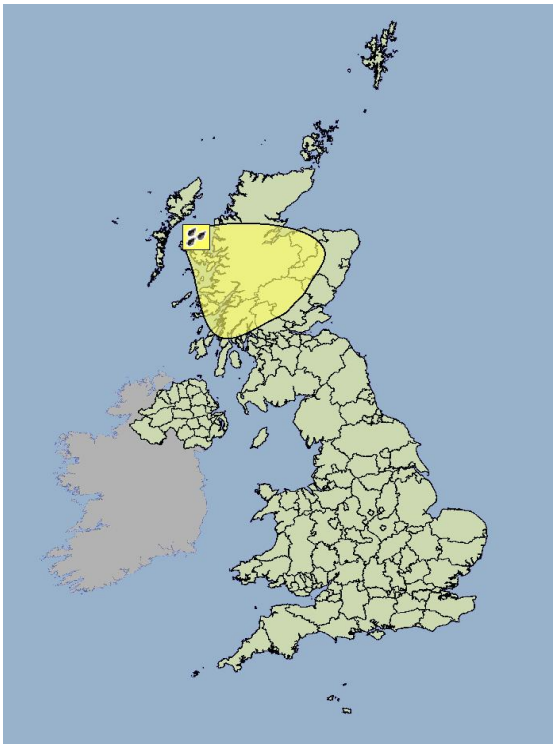
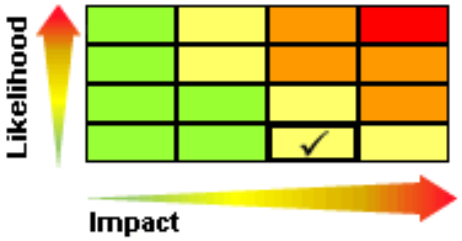
National Severe Weather Warning Service





Chief Forecasters Assessment
A band of rain is likely to bring heavy rain to parts of western Scotland over the weekend and into Monday. The highest rainfall totals are expected to build up over high ground through this period. Outbreaks of heavy rain could become more widespread than over the weekend. Also, later on Monday rain may start to turn to snow across parts of northwest Scotland but this aspect of the forecast is still very uncertain.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **00:05 on Mon, 25th Dec 2017** until **23:55 on Mon, 25th Dec 2017**

Heavy rain is likely over parts of western Scotland from Saturday through to Monday. Heavy rain may become more widespread on Monday compared to the weekend.

Spray and flooding could lead to difficult driving conditions and some road closures. Where flooding occurs, there is a chance of delays or cancellations to train and bus services. There is a small chance that homes and businesses could be flooded, with power cuts and loss of other services. There is also a small chance of fast flowing or deep floodwater causing danger to life and causing some communities to be cut off by flooded roads.
